

PURE ELEMENTS NEVER DIE

PAVATI

**Indestructible**

Aluminum is one of only 117 pure elements on earth. Of all the substances known to man, only chemical elements last forever. Other substances, like fiberglass, are simply composites of various chemical elements. That means it has built-in weaknesses, and over time it will break down (rot) back to its respective elements. Only the elements will survive the test of time.

**Fully Versatile**

Most boats have limitations on where you can take them, and what you can do with them when you get there. But with its immunity to corrosion and decay, a Pavati boat handles saltwater the same way it handles freshwater: effortlessly.

**Lower Cost of Ownership**

Pavati boats are stronger than fiberglass, but they are significantly lighter. At only 80% of the dry weight of their fiberglass counterparts, Pavati wake boats cost less to transport – both on and off the water.

**20%**  
LIGHTER

**2X**  
STRONGER

**50%**  
MORE STORAGE

**1/10<sup>TH</sup>**  
THE MAINTENANCE

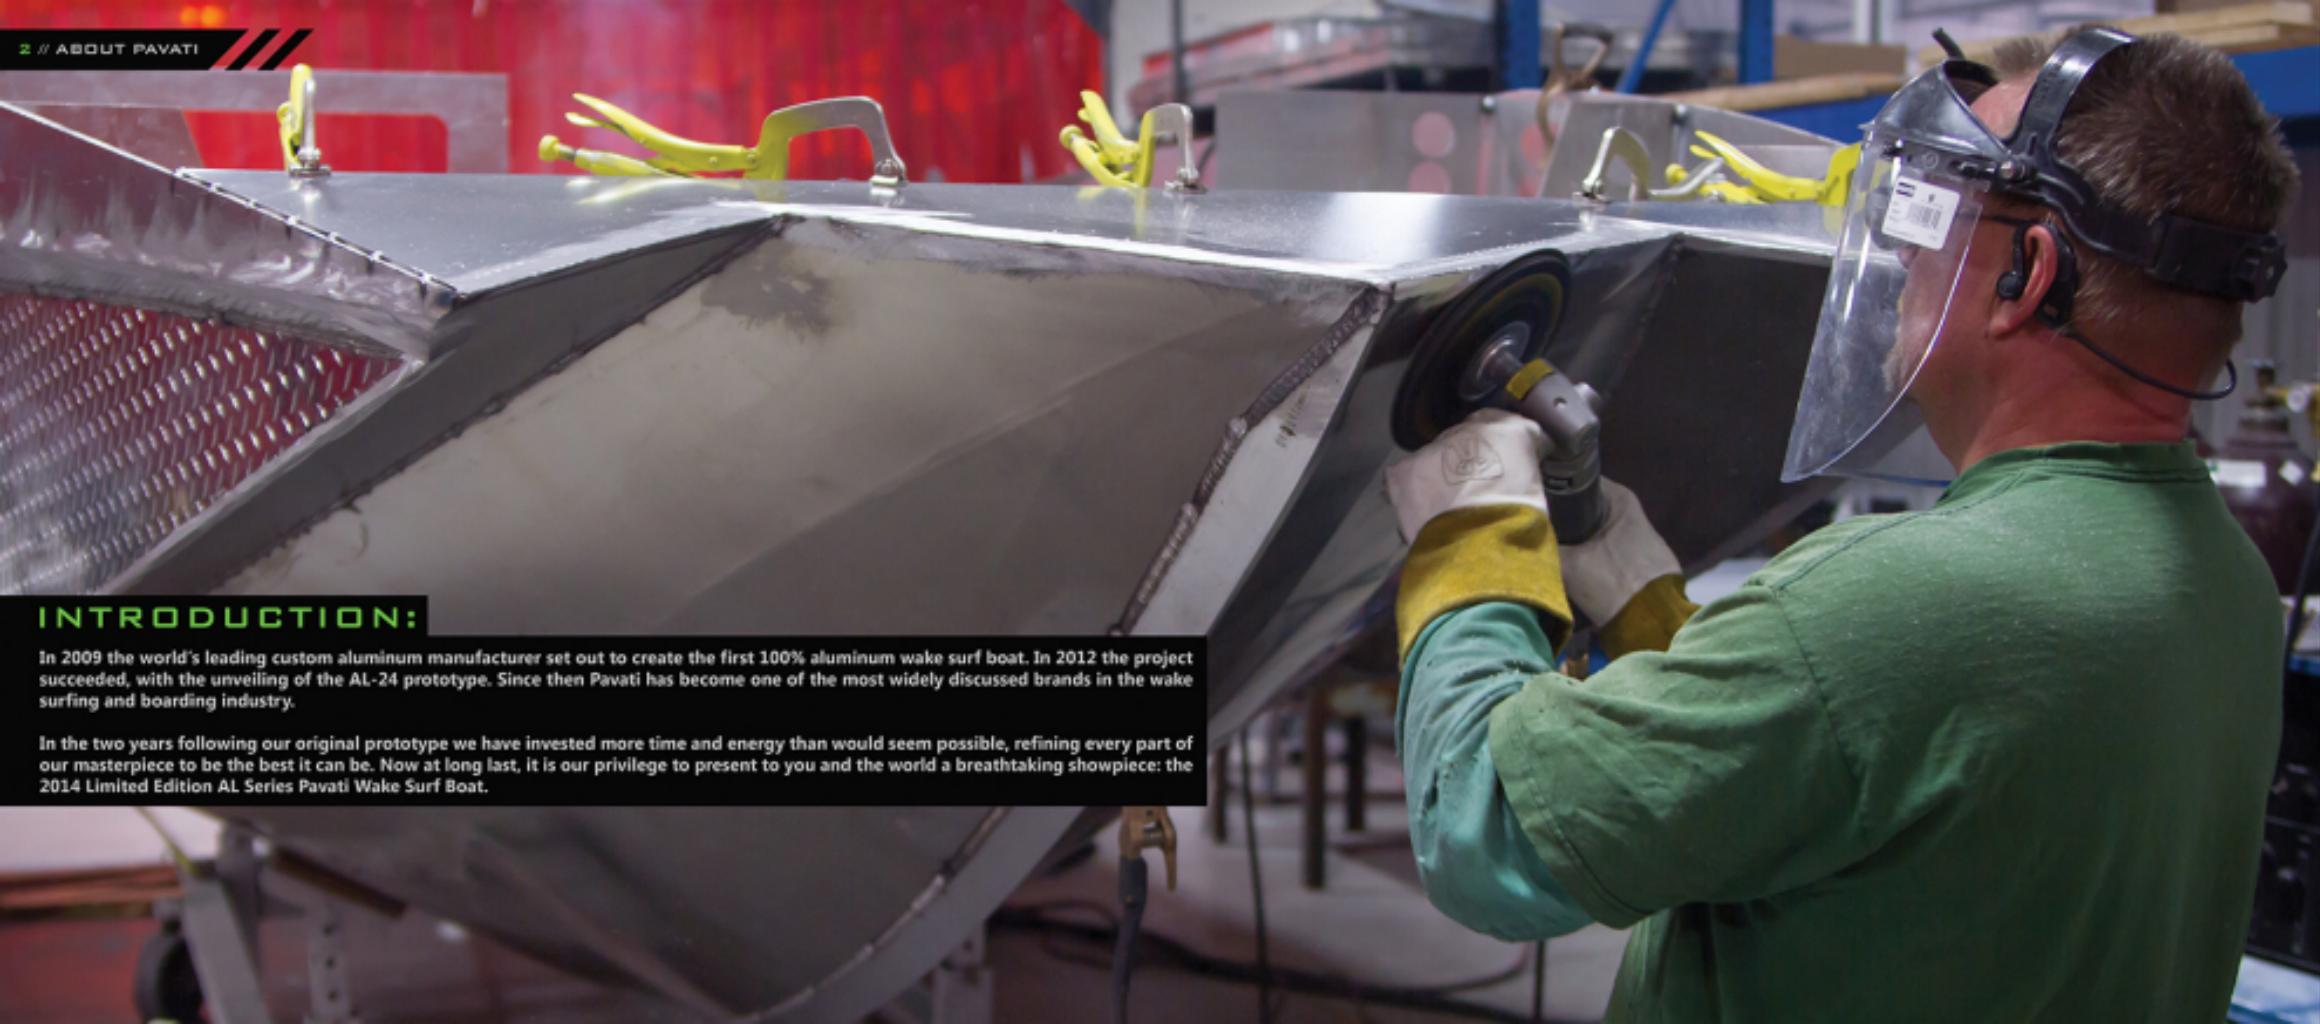

**100X**  
THE LIFETIME

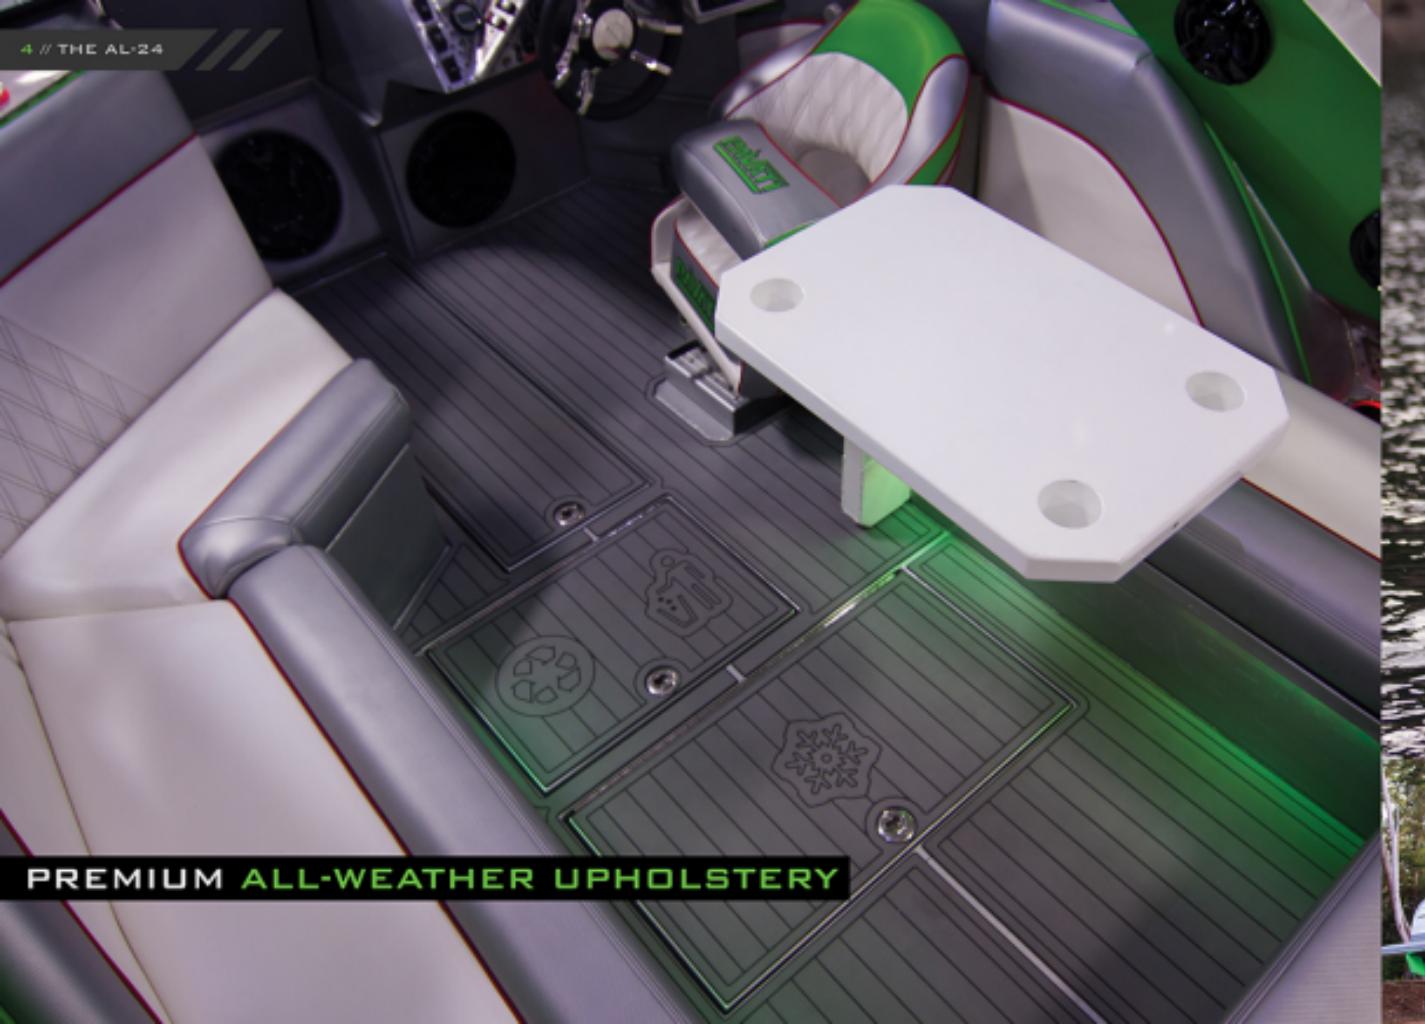

**20%**  
MORE FUEL/ECONOMY

## INTRODUCTION:

In 2009 the world's leading custom aluminum manufacturer set out to create the first 100% aluminum wake surf boat. In 2012 the project succeeded, with the unveiling of the AL-24 prototype. Since then Pavati has become one of the most widely discussed brands in the wake surfing and boarding industry.

In the two years following our original prototype we have invested more time and energy than would seem possible, refining every part of our masterpiece to be the best it can be. Now at long last, it is our privilege to present to you and the world a breathtaking showpiece: the 2014 Limited Edition AL Series Pavati Wake Surf Boat.

## PERFORMANCE

Everything about the AL-24 is designed for surfing. From our new Rip Tide Surf to the carefully engineered ballast, you have complete control over your wave. For the casual surfer, all it takes is the flip of a button and you're making insane waves. For the surfer who wants to tweak every little detail of the wave, we give you complete control. Whether you're a novice or a pro, the AL-24 is designed to maximize your surfing experience.

### Rip Tide Surf System™

The Rip Tide Surf System is a proprietary system that we invented for the AL-24S (Surf Edition). With solid aluminum plates that move out from the stern on demand, the Rip Tide works together with the massive 4,000 lbs ballast to create the best surfing wave possible, every time. Switch from goofy to regular in seconds - the fastest surf system in the industry.

4,000 LBS. BALLAST

RIP TIDE SURF SYSTEM

TOTAL WAVE CONTROL

551 LBs-FT. TORQUE

**LS3 6.2L**  
450 hp  
424 ft-lbs Torque

## GO BIG OR GO HOME

A great surfing experience begins with a great engine. Powered by Indmar's Corvette lineup of LS Series engines, we've selected only the strongest and highest-torque engines for the AL-24. Torque causes your boat to lift out of the water and tilt back, creating the largest wave possible. With a maximum output of 551 lbs-ft. of torque, you will never have want for a bigger wave... only a bigger surfboard.

Diesel option coming soon.

**LSA 6.2L V8**  
556 hp  
551 ft-lbs Torque

**LS7 7.0L V8**  
505 hp  
475 ft-lbs Torque

**Tower Speakers**  
10 inch Woofer, EFG 4 Ohm  
600 Watts Peak Ea.  
300 Watts RMS Ea.

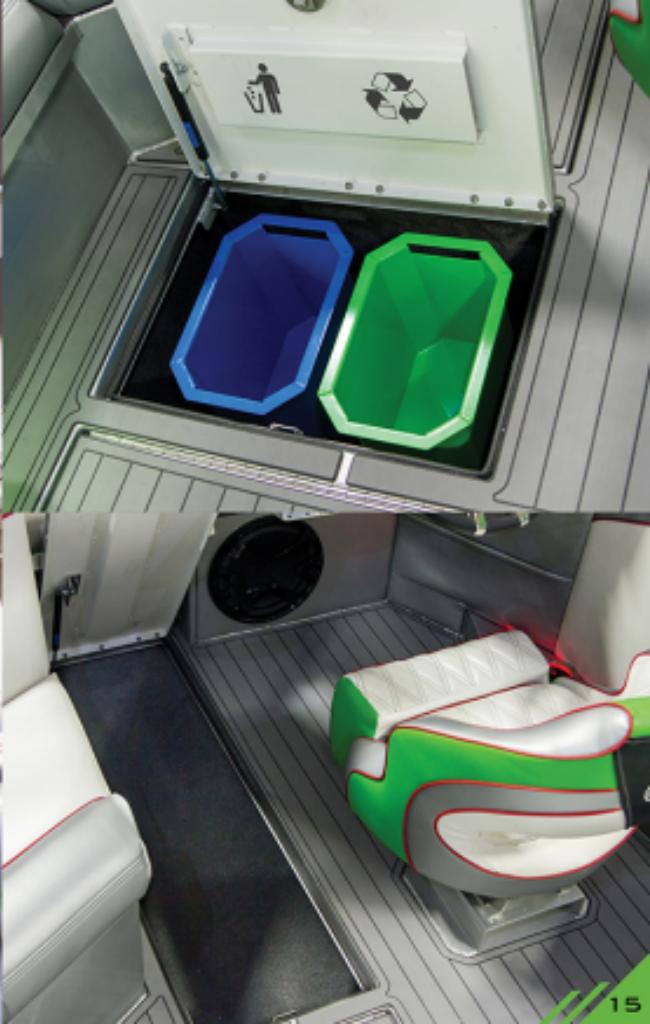

**Coaxial Cabin Speakers**  
8 inch Woofer + 1 inch Titanium Dome Tweeter  
250 Watts Peak Ea.  
125 Watts RMS Ea.

**SPL Marine Subwoofer**  
12 inch Woofer Dual 2 Ohm  
2000 Watts Peak Ea.  
1000 Watts RMS Ea.

## HEARING IS BELIEVING

Boasting Wet Sounds Revolution™ Series sound system, the AL-24 carries the most innovative sound system in all of marine audio. Unlike most conventional designs, this system provides remarkable volume and amazing full range sound quality on axis and off axis at long distances. Extensive acoustic testing has confirmed these speakers' ability to project volume at 80 feet and beyond without any loss of detail or information. So whether you're surfing 30' behind the boat or boarding 80 feet behind the boat, you'll never miss a beat.

## THE MOST STORAGE. PERIOD.

When you pack up the boat for a day on the water, storage is always a challenge. Fiberglass boats don't make it any easier, with limited storage space because of necessary structure support. Aluminum is stronger, and therefore requires less structural support throughout the boat. The result: more storage. With built-in floor coolers, wake board and surf board storage lockers, secure storage drawers, swiveling tower mounted board racks and garbage and recycle bins built in – you can finally have a party without worrying about where to put the trash.
